IEEE TEMS India Webinar Report: Creating IP and How to Patent

IEEE TEMS India organized an online webinar on February 2, 2026, titled "How To ... Series - Episode 8: Creating IP and How to Patent". The guest speaker was Dr. S. K. Murthy, Founder and Managing Partner of SKLS and IP expert, engaged over 90 global attendees.

Dr. SK explained how IP protection elevates market value; unprotected innovations, especially in academia/startups, forfeit potential ROI—prioritising quality grants over mere filings and focused on Patent criteria: **Novelty** (vs. prior art), **Utility** (useful, public-friendly), **Non-obviousness** (inventive for skilled persons) and how they protect detailed implementations (no prototype needed), granting monopoly rights to block others via "delta" from known art.
